

VS2

SIMPLE OPERATION

Three simple steps deliver results, on-site, in minutes:

1 Insert sample.

2 Insert rotor.

3 Read results.

WET LAB TECHNOLOGY, BUT NOT AS YOU KNOW IT!

A state-of-the-art chemistry, electrolyte and blood gas analyser with uncompromising accuracy at the point-of-care¹.

✓ COMPREHENSIVE TEST PORTFOLIO

Test chemistry and electrolyte analytes on a single panel, with **12 different profiles covering 25 analytes**.

✓ ALL COMPONENTS CHECK

The VetScan® VS2 chemistry analyzer has an extremely sophisticated intelligent Quality Control (iQC[®]) system and proprietary algorithms that assure quality and dependable results. iQC is a series of automatic checks that verify the chemistry, optics and electronic functions of the analyzer during each run. iQC guarantees that in any environment only accurate and precise results are reported.

✓ SMALL SAMPLE SIZE

Only requires a small amount of blood, plasma or serum (0.1 mL / 100 µL), advantageous for exotics, puppies & kittens

✓ RAPID AND ACCURATE RESULTS

Precision reference laboratory quality results¹ in approximately 12 minutes. Viewable on the instant print-out or digitally, with our VETSCAN FUSE software

✓ MINIMAL MAINTENANCE

The only maintenance requirement, is to clean the fan filter monthly

✓ PORTABLE

Weighing only 5.3 kg, the analyser has a small footprint and can be taken almost anywhere
